LUISS

Attending students: project (33% of the final score)

The project:

- is done individually
- involves the study of **one** real-world vulnerability
- is submitted as **one** 15 pages PDF report:
 - description of the affected program
 - description of the vulnerability type
 - description of the vulnerability
 - exploitation of the vulnerability
 - mitigation of the vulnerability
 - [optional, only for higher score] reproduction and fix of the vulnerability in a docker environment
- is evaluated based on a 0-30 points scale:
 - 26 points for the report
 - 4 points for reproduction environment (optional)

Non-attending students: project (50% of the final score)

The project:

- is done individually
- involves the study of **two** real-world vulnerabilities
- is submitted as **two** 15 pages PDF reports (30 pages total):
 - description of the affected program
 - description of the vulnerability type
 - description of the vulnerability
 - exploitation of the vulnerability
 - mitigation of the vulnerability
 - reproduction and fix of the vulnerability in a docker environment
- is evaluated based on 0-30 points scale:
 - 20 points for the reports
 - 10 points for reproduction environment
- **Reproduction environment is required!**

CVE Assignment

- Each student should pick one (or two when non compliant) CVE
 - Google query: **CVE program that you want to consider**
 - E.g., "Wordpress CVE", "Flask CVE", "n8n CVE", ...
 - You can consider even vulnerability types that have not been covered in the course
 - Understand whether there is enough material to analyze:
 - Source code (if the application is open source)
 - Vulnerability description
 - Exploit code
 - etc.
- Check which CVEs have been already proposed by other students and thus cannot be considered by you: **URL**
- Submit your proposal via the form: **FORM**
- Check if your CVE has been approved: **URL**

When your proposal is approved, you can start working on the report(s).

Project Submission

You must submit the report(s) and the related file required to reproduce your results using the form available on the course website: **FORM**

DEADLINE: 7 days before the exam date that you have chosen for your final exam.
